32. (Original) A composite reactive multilayer foil comprising:

at least one first set of reactive layers; and

at least one second set of reactive layers in thermal contact with the first set, the layers of the first set having thicknesses which are relatively larger than those of the second set, whereby the layers of the second set, upon ignition, ignite the thicker layers of the first set.

33. A composite reactive multilayer foil comprising:

a first set of reactive layers; and

a second set of reactive layers in thermal contact with the first set, the layers of the first set having compositions which are relatively more reactive than the second

set, whereby the layers of the first set, upon ignition, ignite the less reactive layers of the second set.
